Gold mining and cattle grazing have left their scars on this bit of desert. The pinkish prospector has gouged everywhere among the hills.

Joshua country

Joshua tree belongs to the same family as the mim. They are both illis and the lily is the Smith family of the plant world. In this lily family, there is a genus known as the yucca! And the yucca also takes a variety of forms, probably the degeneration of the Spanish bayonet. But one of these yuccas found the conditions a part of the Southwest desert greatly to its liking and became a sirable tree: a green sort of plant with curly arms crooked at the elbow, and so unsymmetrical that it looks as though it were constantly asking itself the question: "What shall I do next?" A score of these yuccas are nearly 40 feet high.

The name was given to this giant yucca by the Mormons, who saw in its extended arms a symbol pointing to the promised land they were seeking. It may be so but the promised land must have been pointing in all points of the compass, for the Joshua tree points everywhere, including up and down. Though the tree itself may be nothing of beauty, when blooming time comes it sends forth a cluster of creamy-white blossoms a foot long at the very ends of its branches.

electronic funds transfer network? Who made those arrangements?

o What were the roles of Senator Abourezk, Glenn Feldman and John Van Dewerker?

o Did the First Intercontinental Development Corporation have any role in this 1980 trip?

o Where did Brian and Michael stay in Iran and how long were they there?

o When Michael integrated a report writer software product with PROMIS for operation on a VAX computer manufactured by Digital Equipment Corporation, did he do the work under contract or subcontract with Wackenhut? Was it work being done for a federal government, foreign government or state and local government customer? If so, which government agency and what year?

o Does Michael have a copy of the Wackenhut annual report that makes reference to "tracking software for law enforcement Administration"? Was Wackenhut selling that software? If so, how and to whom and when? Was it the VAX/VMS version or some other version of PROMIS such as an IBM mainframe version or the version that runs on PRIME Minicomputers under the PRIMOS operating system?

o When will Michael come to Washington to meet with Senator Abourezk and others?

o Will Michael bring with him a copy of the PROMIS software?

o Michael said that Richard Brenneke did a deal with Earl Brian and Floating Point Systems of Portland, Oregon, involving file servers for a government agency. When? What government agency? What software?

Tisoft, Inc. of Northern Virginia won the Justice Department's Project EAGLE contract in June 1989 under Attorney General Thornburgh. This is the procurement that we believe was supposed to go to Earl Brian and other unidentified "friends" to install the PROMIS software on new computers in every litigative and investigative office of DOJ. Patrick R. Gallagher is the CEO of Tisoft, Inc. and supposedly the sole stockholder. Who is Gallagher? For whom is the fronting? Does Gallagher have ties to Earl Brian and/or Wackenhut?
